

Socorro Public Library is happy to introduce a new eBook collection, Axis 360. Axis 360 works with the free Blio, Bluefire and Adobe Digital Editions (for PC or Mac) eBook reading software that you may download to your computer, tablet, or other compatible device. If you do not know which application or software to use, please contact the library.

Axis 360 Magic Wall titles will currently run on Android, iOS, and Windows PC devices. When a title is checked out through the Axis 360 Magic Wall, it can be moved to multiple devices which support Blio, such as an iPhone, iPad or Kindle Fire.

### **Socorro Public Library** **How to Checkout/Download E-Books (Axis 360) to your Readers with Blio**

1. Visit the library's website at: [www.adobelibrary.org](http://www.adobelibrary.org) and click on the banner link that says "Download E-books" or visit [socorro.axis360.baker-taylor.com](http://socorro.axis360.baker-taylor.com)
2. By following the banner link or visiting the above site, you will reach our **magic wall**. This contains our selection of current fiction titles for adults and young adults. Browse until you find a title you would like to checkout. (You may also search by title, author, series, subject)
3. Select the **format** you would like your book in (either Blio or Epub, differences explained below) and click Checkout Now.
4. You will be prompted to enter your **Library Card ID** and **Password**. For first-time users, your ID is spl and then your library card number. **Ex.: spl82300** your password is **spl**. After entering these, you will be able to change your password and add an email address and name for your account.
5. Once you have logged in and checked out your book, you will be prompted to **login** into your Blio account. (Instructions for setting up Blio below.) Login with your username and password and your book will be delivered to your device via Blio.
6. **You are done! Open** the Blio application on your device and your e-book selection will download automatically.

At this time, Axis 360 is compatible with many devices, however Kindle e-readers (with the exception of the Kindle Fire) and the Nook HD are **NOT** compatible. Please check back to see if these devices become compatible.

If you need additional help, please refer to the "**Help**" portion of the Axis 360 Magic Wall for detailed information about Axis 360 and its components or contact the staff at the library.

#### **Epub vs. Blio**

The main difference in the two types of Ebooks for downloads is the devices on which they will work. For Nooks, Color Nooks, Sony or Kobo eReaders, you will need to download the Epub versions of these books using Adobe Digital Editions. You must have this software loaded on both your PC and device. For Android devices, iOS devices and the Kindle Fire, eBooks can be download with Blio and sometimes Bluefire. You must have the software loaded onto your device before you will be able to read your eBook. The Kindle Fire may require some extra assistance. If you would like more detailed information on how to download or set up any of these applications, please contact the library.
